Call to Action: Levy on Manufacturers of Sugary Drinks

Excessive sugary drink intake is a major risk factor for the development of unhealthy weights and resultant chronic illnesses, such as type 2 diabetes, heart disease, hypertension, stroke and some cancers.

Many Canadians drink unhealthy quantities of sugary drinks, which often leads to serious illness, lost productivity and significant health care costs to society.

As has been effectively done in places around the world such as several American cities, Mexico, Chile, France, Hungary, and the UK, the Government of Canada should introduce a levy on manufacturers of sugary drinks to reduce consumption and to partially recover related health care costs. The proceeds of a sugary drink levy on manufacturers should be used to fund healthy living initiatives including better public awareness of the harms of sugary drinks.

The following organizations and individuals endorse the call for a levy on manufacturers of sugary drinks in Canada, as outlined above.

- Alberta Policy Coalition for Chronic Disease Prevention
- Association of Registered Nurses of Manitoba
- BC Healthy Living Alliance
- BC Pediatric Society
- Canadian Association of Gastroenterology
- Canadian Association of Nephrology Social Workers
- Canadian Cancer Society
- Canadian Medical Association
