## How do you improve resuscitation training?

Mastery learning and deliberate practice	Practice until learners demonstrate mastery of skills
Spaced practice	Shorter, more frequent learning sessions
Contextual learning	Use of "real world" training experiences recognized by learners
Feedback and debriefing	Providing structured opportunities for reflection and feedback
Assessment	Measuring competency throughout a course with a variety of tools
Innovative educational strategies	Exploration of gamification, social and digital platforms to make learning "stick"
Faculty development	Continuous coaching and training of instructors
Knowledge translation and implementation	Localize programs to fit learners' needs
