

## **Stakeholder Identification and Analysis for Early Health Technology Assessment of Human Pluripotent Stem Cell-derived Cardiomyocyte Therapies for Heart Failure**

**Location:** Canada-wide

**Number of participants:** 10 people

**Recruitment period:** Until August 2026

**Description:** Researchers at the University of Toronto are conducting a stakeholder engagement study to explore the perspectives, interests, priorities of key stakeholder in the development, and delivery of stem cell therapy for heart failure. To participate, we invite you to One-on-One Interview: (via phone or Zoom), a more in-depth conversation about your experience and perspectives on the topic.

**Language:** English only

**Eligibility:** Researchers are looking for a diverse group including ranges of age, sex and gender orientation, with lived experience in heart failure or care giver or family member.

**Participant requirements:** Participation includes one open-ended, semi-structured interview to be conducted virtually over the phone or using Zoom. Interviews will last between 45-60 minutes in duration. Interview participants will receive an individual \$50 gift card for their time and insights.

**Institution:** University of Toronto
