

# National New Investigators Competition – Seed Catalyst Grant Results: 2018/2019

Seed/Catalyst Grants will provide funding support to National New Investigator (NNI) applicants to conduct research to lay the groundwork for a new grant application. The Seed/Catalyst grants offer New Investigators the opportunity to explore new and innovative ideas with high potential to create impact on the health of Canadian women. Seed/Catalyst grants could support knowledge translation and implementation of knowledge into practice. The funding for this competition has been made possible through partnership with Health Canada.
