RECRUITING PARTICIPANTS

DO YOU EXPERIENCE SHOULDER PAIN AFTER STROKE?

The AIRE Research Team at the University of Manitoba is currently recruiting participants for a research study that will use a small external device to measure brain activity during shoulder movement.

The study will involve one session.

In-person session (60–90 min)

- The participants will perform a few simple functional shoulder movements, like lifting their arms.

Participants may stop at any time if they feel uncomfortable

Participants will receive compensation for participating.

ELIGIBILITY CRITERIA:

You may take part if you:

- Are 18 years and older
- Have had a stroke at least 3 months ago
- Have shoulder pain on one side since the stroke
- Can follow instructions and give consent

You cannot take part if you:

- Have shoulder pain caused by a recent trauma
