

New Investigator Awards

Progress Report

The following is a progress report template for the Heart and Stroke Foundation of Canada (the Foundation) New Investigator Awards Program. Its purpose is threefold:

- 1) to gather information pertaining to the results of research projects supported by the New Investigator Awards program,
- 2) to update any changes in awardees' contact information, and
- 3) to aid in the evaluation of the Heart and Stroke Foundation New Investigator Awards program.

Instructions:

1. Please forward your **completed** progress report via email (research@heartandstroke.ca). A progress report must be submitted no later than August 1st.

Please note: All responses will be kept confidential, according to the requirements of the Heart and Stroke Foundation and the Personal Information Protection and Electronics Document Act (PIPEDA).

SECTION C: PROJECT PROGRESS AND RESULTS

1. Please tell us the title of your research project.

2. Please estimate what proportion of your research falls under the following **four (4) themes of health research**, as defined by the Canadian Institutes of Health Research.

%

- Basic Biomedical (I)
(Research with the goal of understanding normal and abnormal human functioning, at the molecular, cellular, organ system and whole body levels, including the development of tools and techniques to be applied for this purpose; developing new therapies or devices which improve health or the quality of life of individuals, up to the point where they are tested on human subjects. Studies on human subjects that do not have a diagnostic or therapeutic orientation.)
- Clinical (II)
(Research with the goal of improving the diagnosis and treatment (including rehabilitation and palliation) or disease and injury; improving the health and quality of life of individuals as they pass through normal life stages. Research on or for the treatment of patients.
- Health Services/Systems (III)
(Research with the goal of improving the efficiency and effectiveness of health professionals and the health care system, through changes to practice and policy. Health services research is a multidisciplinary field of scientific investigation that studies how social factors, financing systems, organizational structures and processes, health technologies, and personal behaviours affect access to health care, the quality and cost of health care, and ultimately our health and well-being.)
- Social, Cultural, Environmental and Population Health (IV)
(Research with the goal of improving the health of the Canadian population, or of defined sub-populations, through a better understanding of the ways in which social, cultural, environmental, occupational, and economic factors determine health status.)
